Assemblyman Ed Ra: Helping Our Children Succeed In The New School Year

While our students were enjoying their summer break, Assemblyman Ed Ra was working to ensure they had a brighter future this school year.

Ed Ra has always fought for our children. Ra introduced his “Next Steps” agenda earlier this year, and restored the Gap Elimination Adjustment (GEA) funding, which will ensure almost \$13 million in additional funding for local school districts.

Here is what Assemblyman Ra has on the agenda for schools next year:

- **Repeal test-centric teacher evaluation mandates and create a system utilizing proven measures of learning.**
- **Create new State learning standards that are less focused on standardized tests, with the guidance and input of the experts: teachers, school administrators, and parents.**
- **Provide multiple diploma pathways to ensure all our children find success.**
- **Give local school districts the freedom and resources they need to develop their curriculum locally and define what their students’ unique education needs are.**
