# **Breaking News: Student Test Positive for Coronavirus Brooklyn College Campus Closes March 13**

***Assemblymember Bichotte's  
Prayers and Thoughts are with the Student for  
Speedy Recovery***

**Flatbush, Brooklyn:** A member of the Brooklyn College school community has self-reported a positive test result for COVID-19. As a result, Brooklyn Campus is closing their entire campus on Friday, March 13. This includes grades 11 and 12 of Brooklyn College Academy, which operates on the campus. Grades 9 and 10, which operate off-campus, will remain open.

“Our thoughts are with her for a full and speedy recovery,” **said the president, Michelle J. Anderson.** “All students, staff, faculty, and visitors should **NOT** come to any of the College’s buildings.”

The school may be closed for longer pending direction from Brooklyn College.

We have prepared for this and are on the ground supporting safe, orderly closure of the school.

We Encourage everyone to stay calm.

Here is what's happening in the school over the next 24 hours:

- In the next 24 hours, the school building will be cleaned and disinfected. That disinfection will accord with New York State Department of Health guidelines and must be complete before accepting returning students. As a reminder, NYCDOE routinely conducts deep cleanings in your school.
- During the closure, Brooklyn College will consult further with health officials to determine what other next steps may need to be taken, including when to reopen campus.

Other important considerations for the school community:

- Grab and go meals will be served at the Midwood main entrance. Grab and go breakfast started at 7:45 AM

Continuing learning:

- Parents and students will be strongly encouraged to access instructional resources through the DOE's specific grade-level instructional materials available online at [www.schools.nyc.gov/learnathome](http://www.schools.nyc.gov/learnathome) and/or through the school's online learning platform. We will follow up with specific information.

**Council Member Farah Louis, State Senator Kevin Parker** , and I, **Assemblymember Rodneyse Bichotte** will be updating the Flatbush Community on further notices while working with **CUNY** , the **Mayor's** office and the **Governor's** office.

Our Thoughts and Prayers are with the student for speedy recovery while she is in the hospital.

### Brooklyn College student tests positive for coronavirus

A student at Brooklyn College has tested positive for the coronavirus, the school said on Thursday night. The woman was in the hospital recovering from the illness and the college - which is part of the City University of New York - will close on ...

## Updates: Coronavirus

As the number of 2019 **novel coronavirus (COVID-19)** cases increase, it's important that everyone has the facts.

First, while this is a serious, evolving public health issue, there is no reason to panic. The vast majority of people who have contracted the virus haven't become seriously ill and only a small percentage require intensive care. <sup>[1]</sup> Around 1 out of every 6 people who gets COVID-19 becomes seriously ill and develops difficulty breathing. Older people and those with underlying medical problems like high blood pressure, heart problems, respiratory conditions or diabetes are more likely to develop serious illness. <sup>[2]</sup>

New York State and federal health officials are carefully monitoring the outbreak, studying how the virus spreads and how to combat it and are working to find a vaccine. The novel coronavirus has not previously been found in humans and was discovered late last year. <sup>[3]</sup>

**As of the afternoon of March 11, there are 216 confirmed cases of COVID-19 in New York State.** <sup>[4]</sup>

While you will likely be seeing numbers continuing to rise, it's important to keep in mind that as health officials get more tests done, the more cases they'll uncover. <sup>[5]</sup> Increased testing will help health officials gather more information to combat its spread. This means that infected individuals can take proper measures to help keep the virus from spreading and get the treatment they need if necessary.

The state is currently working on measures to contain the virus and limit New Yorkers' exposure. **New York is also investing in a \$40 million plan** to purchase necessary equipment and supplies and hire and train more health care workers. In addition to constant communication with local and health officials, state leaders and the Department of Health (DOH) are also holding conference calls with people on the ground to ensure those on the frontlines have everything they need to slow the spread of coronavirus. And the U.S. Food and Drug Administration (FDA) has authorized New York to test locally for the virus, which means **results are now possible for COVID-19 within hours** . <sup>[6]</sup>

COVID-19 shouldn't be confused with coronaviruses that commonly circulate among people causing mild illnesses like the common cold. **The most common symptoms include fever, tiredness and a dry cough, and some people may experience aches and pains, nasal congestion, runny nose, sore throat or diarrhea** . Anyone with a fever, cough and difficulty breathing should call their doctor prior to a visit so they can be directed, if necessary, to the right health facility for testing and treatment. This will help prevent the novel coronavirus from spreading and also protect you from other viruses and infections. <sup>[7]</sup>

While researchers are still studying how the virus spreads, individuals can catch COVID-19 from others who have it. They believe it **can spread from person-to-person via small respiratory droplets from the nose or mouth when a person with the virus coughs or exhales. These droplets can land on surfaces or objects, and others can catch COVID-19 by touching the surfaces or objects and then touching their eyes, nose or mouth. Officials say the virus can also be caught by breathing in the droplets, which is why it's important to stay more than three feet away from anyone who is sick.** <sup>[8]</sup>

While you may have seen photos of individuals wearing masks, they're not effective at preventing someone from getting the virus. Masks are intended for use by health care professionals, people who

are already ill and are trying to ensure they don't get others sick and those taking care of someone who is sick. There is currently a world-wide shortage of masks so please use them wisely and only when absolutely necessary to avoid waste and misuse. <sup>[9]</sup>

## You can stop the spread of coronavirus

- Wash your hands regularly
- Cover your cough or sneeze
- Avoid touching your face

The best preventative steps you can take are the tried and true ones:

- frequently wash your hands with soap and water for at least 20 seconds
- avoid touching your nose, mouth and eyes
- cover your cough or sneeze with a tissue or your elbow<sup>[10]</sup>
- try to avoid coming in contact with someone who is sick
- disinfect frequently touched objects and surfaces at work and at home.<sup>[11]</sup>

If you can't wash your hands with soap and water, be sure to **use hand sanitizer that contains at least 60% alcohol**. <sup>[12]</sup> If you're at a **higher risk** of getting seriously ill from COVID-19, such as the **elderly** or those with **underlying medical problems**, you should also try to avoid crowds and touching high-touched surfaces such as door handles, hand rails and elevator buttons. <sup>[13]</sup> In order to better protect yourself, those who smoke should cut back or try to quit as smokers are at higher risk of getting respiratory infections and twice as likely to develop pneumonia than a non-smoker. <sup>[14]</sup> It's also important that you stay home if you're feeling sick to prevent germs from spreading.

**New York City officials are asking that anyone who is able to avoid public transportation do so, or if a bus or subway car is packed, wait for one that has more room.** <sup>[15]</sup>

Experts have recommended ensuring you have basic home supplies – food staples, laundry detergent, over-the-counter medicine and pet food. You should also try to have at least a 30-day supply of any prescription medication. Go over any emergency plans you may have with every member of your household and make sure you keep up-to-date with any information from your child’s school district.

Meanwhile, the governor has said the state would institute new cleaning protocols in heavily used public areas, such as bleaching surfaces on public transportation and in schools. <sup>[16]</sup> Local health departments will notify school districts if and when they need to close and when they can reopen. <sup>[17]</sup>

## Cancelled Events

- The World Health Organization (WHO) has declared the COVID-19 a global epidemic.
- **CUNY and SUNY**, the state's public university system has cancelled in-person classes Starting March 19 through the end of the spring semester <sup>[20]</sup>
- All NYC Public Schools remain open except Laboratory school of Finance and Technology, South Bronx Preparatory School, Also monitoring the following schools IS 34 and IS 27.
- **All Catholics are being closed.**
- **Assemblymember Rodneyse Bichotte's Women of Distinction Annual Award Ceremony has been postponed till further Notice.**
- **St. Patrick's Day Parade** is cancelled.
- **NBA** season is cancelled.
- **MLB** spring training is cancelled.
- **NCAA** Conference Tournaments cancelled.
- **MLS** Suspended.

# HONORING OUR SHEROES

## WOMEN OF DISTINCTION AWARD CEREMONY

Join Assemblymember Rodneyse Bichotte  
As We Celebrate Exceptional Women In Our Community

**Thursday, March 19, 2020**

**Woody Tanger Auditorium**

Brooklyn College Campus Library  
2900 Bedford Avenue, Brooklyn, NY 11210

6:00 p.m. to 8:00 p.m.  
(Reception at 6:00 p.m.)

### PRESENTERS FOR 2020

Mistress of Ceremonies  
Audrey Walen

Sponsor  
Chibaku Adulunké Okome

### AWARDEES FOR 2020

Lauren Elvers  
Business & Entrepreneurship

Detective Kim Walker  
Community Engagement

Pieranna Pieroni  
Environmental Activism

Marietta Small  
Lifetime Achievement

Tadia Toussaint  
Arts & Entertainment

Ella Frederick  
Education

Dr. Azhra Wasti  
Health

Sponsor

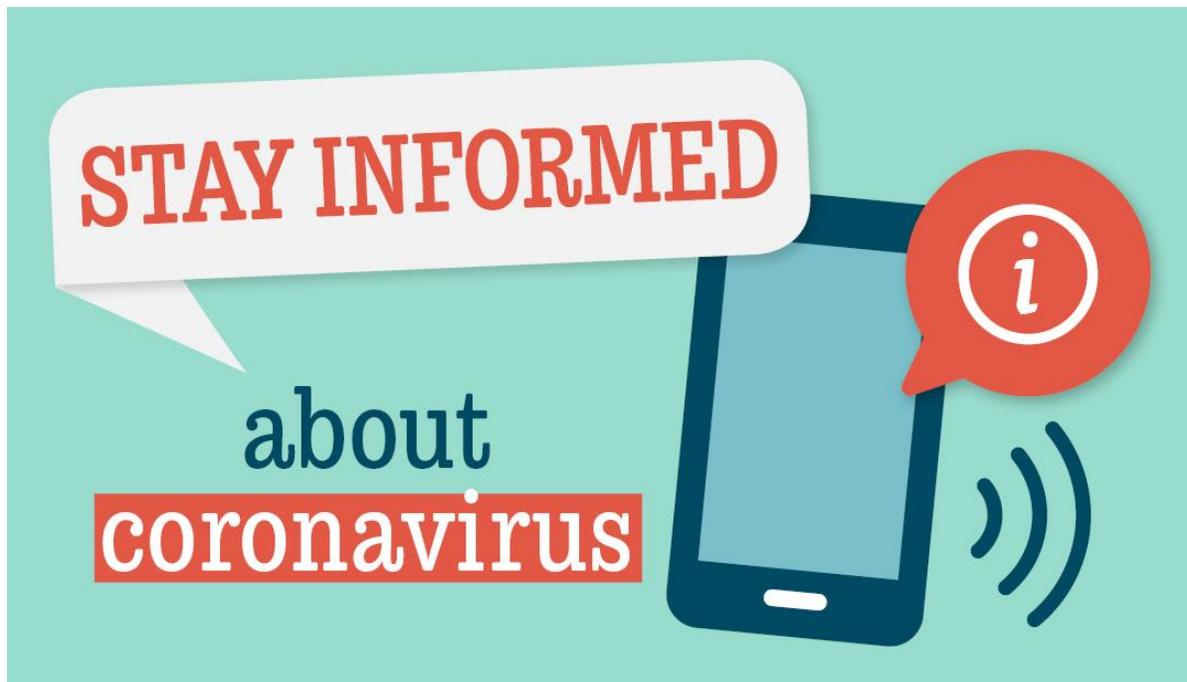

Space is limited. RSVP is required to [lafondr@nyassembly.gov](mailto:lafondr@nyassembly.gov) or 718-940-0428

For more information about this free event or any community concern,  
contact Assemblymember Bichotte's district office at: 1312 Flatbush Avenue Brooklyn, NY 11210 718-940-0428

## SMALL BUSINESS

- **New York City will also be providing relief to small businesses that see a reduction in revenue because of COVID-19**
- **Businesses with fewer than 100 employees whose sales have decreased more than 25% will be eligible for zero-interest loans of up to \$75,000 to help mitigate the losses.**<sup>[18]</sup>
- **Small businesses with fewer than five employees will also be offered a grant to cover 40% of payroll costs for two months to help retain employees.**<sup>[19]</sup>
- **Anyone interested in learning more about these programs should call 311 for more information**

At the state level, we continue to discuss ways to ensure employees aren't forced to choose between staying home when sick – and not getting paid – or providing for their families. This includes discussing an expanded sick leave policy and measures to help small businesses that have been adversely affected by COVID-19.

Health officials are working tirelessly to protect public health and contain this virus. And, as your representative in Albany, I am working to ensure that our state is putting the health and safety of our families first.

Remember COVID-19 can affect any community and we must stand by one another during this time, not alienate, threaten or discriminate against others.

For questions you can also reach out to the New York State's novel coronavirus hotline at **1-888-364-3065**. For continuous updates, you can visit the following websites:

- [Center for Disease Control and Prevention \(CDC\)](#)
- [World Health Organization \(WHO\)](#)

*The CDC also now has the option for you to sign up for weekly updates on COVID-19.*

## RECAP

# CORONAVIRUS: Q & A

### **What a What are the symptoms?**

Symptoms range from mild to severe and

include fever, cough and shortness of breath. Symptoms often appear two to 14 days after exposure.

### **How does it spread?**

Health officials are studying how the virus spreads, but it's believed to spread from person-to-person via respiratory droplets that are released when an infected person coughs. Individuals are believed to be most contagious when they're the sickest.

### **When should I see a doctor?**

If you develop a fever and symptoms of respiratory illness such as a cough or shortness of breath, call your health care provider before seeking treatment in person and tell them you may have the novel coronavirus so they can take proper precaution
