PAID
ALBANY, NY
PERMIT NO. 75

Long Island's natural beauty is part of what makes our communities special. I am committed to working with local partners to protect our water, preserve our environment and keep our region strong for generations to follow.

How I'm working to provide clean water for Long Island. These would:

- ✔ Support shellfish and seaweed farming to help improve water quality by reducing excess nitrogen and protecting coastal ecosystems (A.5269)
- ✔ Ban certain pollution in the Long Island Sound and Great South Bay (A. 4221)
- ✔ Ban dumping bilge water into state waters from boats, marinas, or moorings (A.4213)

Resources:

Suffolk County Water Resources

Provides water testing, septic system guidance, and public health protections.

Long Island Commission for Aquifer Protection

A free online database to check Long Island drinking and groundwater quality.

ASSEMBLYMAN

KEITH P. BROWN

Assemblyman Brown represents the 12th district, which consists of parts of Suffolk County. For more information, please visit Assemblyman Brown's official website, or contact his district office at 631-261-4151.
