**All expired and unwanted medication dropped off during the event will be

**Disposing of medication improperly, such as flushing it down a toilet or pouring  
it down the drain, can lead to pollution in the water we use for drinking, cooking,  
and bathing. Safe disposal helps protect our health and keeps prescription drugs  
away from young children or others who might use them improperly. Additionally,  
throwing out or recycling sensitive paperwork without shredding it first can lead  
to identity theft.**
