SAVE ENERGY AND SAVE MONEY TOO!

Energy-saving strategies differ depending on the type of home or apartment you live in, but with a little practice, you can find yourself saving hundreds and reducing your carbon footprint along the way.

FOR EVERYONE:

- As the holiday season approaches, decorative lighting is everywhere; consider setting those lights on a timer or unplugging them overnight
- To keep cold air out and warm air in, use door bottoms, thresholds, or door shoes that seal gaps beneath exterior doors
- Keep drapes open during the warmer days of the season and during daylight hours for that natural heat

FOR RENTERS:

- Consider less energy usage for lower energy bills, i.e. unplug devices when not in use
- When sleeping, if you have a thermostat, lower the temperature by seven to ten degrees

- Ask your landlord about caulking and weatherstripping around your windows and doors to reduce heat loss

FOR HOMEOWNERS:

- Consider installing low-water-use fixtures in your sinks and showers
- If you have an attic, make sure the vents are not blocked so air can flow through freely to minimize the use of an attic vent fan
- When getting your boiler serviced, which may be a yearly event, ask for a combustion analysis, a report that will tell you how efficiently it is operating

There are several ways to make your home or apartment more efficient. For those who would like to learn more, feel free to visit nyscrda.ny.gov/Residents-and-Homeowners to read more tips and tricks.
